

The layered defense — a load-bearing claim must pass all seven

1 Status calculus

[E]/[C]/[O]/[X] · ledger single source · audit_sync

2 No free pattern + reverse audit

v305 · E8.REVERSE.AUDIT (3/8 readout)

3 Over-determination map

v427/v428 · seven readouts compress one (2,3,5)/E8 object

4 Firewall + No-Unit

v187/v213 · v153 (v_geo theorem-forbidden)

5 Frozen registry + null model

v84 · v100 Monte-Carlo · v375 scorecard

6 Two independent paths

Wolfram 116+327 · Lean 4 kernel proof

7 Red team

tfpt_5 · Targets A-F · named kill tests
