

verification/status_ledger.csv

■ Numerical ■ Physical / conditional ■ Open

Axiom (declared input; reduces to the anchor α (1.1.21.1))

(conditional; sharpened)

(critical; one-way selection; superseded)

(conjecture) $\neq$ Open (full measure)

(came from new physics)

(superseded)

(physical framing)

(physical; $\mathbb{R}^3$ (finite link))

(physical; $\mathbb{R}^3$ (finite link))

(confirmed (homotopy))
